

# Company profile

## Business objectives

Development and manufacturing of intelligent systems for remote control of resources like electricity, water, gas and street lighting. ADD offers outsourcing services for manufacturing and testing of electronic devices, as well as designing of the device itself.

## Customers

Utilities, measurement device manufacturers, LED luminaries manufacturers, municipalities, system integrators, energy efficiency companies, electrical designers and others.

Some of our customers are EVN Bulgaria, EVN Macedonia, Energo Pro, CEZ, municipality of Roman, municipality of Smolyan, etc.

## Factory facilities

Factory size: 5 000 sq. meters.

The factory is equipped with:

- SMD line equipment:  
PANASONIC Module, Placement Machine – high speed 12 Nozzles, PANASONIC Module Placement Machine - 3 Nozzles, PANASONIC Reflow Oven, PANASONIC Screen Printer, AOI Marantz Electronics U22X.
- Plastic injection equipment:  
Engel Victory - 1350/300 Tech, 330/110 Tech, 750/160 Tech.
- Wave soldering system ERSA N-Wave 330, Selective Soldering system ERSA Ecosselect 2,
- ZERA Metrology: Meter Test Systems - ID11554, ID11818
- Laser marking and engraving: FOBA M2000-B-Y.0200-FC
- Electricity meter Functional testing, calibration and customization.

## Our history

ADD was founded in 2006 and has grown steadily since then, becoming the regional leader in the smart metering industry and reaching a team of 60 experienced professionals. We first started offering smart metering systems for electricity. Later we expanded our portfolio developing other intelligent systems and adding EMS to our activities. Now we are a complex solutions provider, but at the same time we are trying to be as flexible as possible.

## Core values

**Information → knowledge → smart decisions → better life**  
– This is how we see the benefits of our technologies, with which we contribute to our customers' satisfaction.
