# Quick Facts

WEIMA is valued as a quality brand across the world.

Our shredders, briquette presses, packaging and drainage presses run safely, reliably and economically – and we continuously develop these sophisticated technologies further.

Whoever purchases a machine from us, has the certainty of receiving a custom-fit solution of the best quality.

**€ 80 Mio.**  
revenue

**1.200+**  
machines yearly

**320**  
employees

**40.000+**  
machines sold

# Divisions

SHREDDING + COMPRESSING

Briquette presses

Series C and TH

## Briquetting

Single-shaft  
and four-shaft shredders

Series WL, WLH, WLK, WKS,  
WPC, WFC, WPL and ZM

## Shredding

Cutting mills and  
granulators

Series WNZ and WSM

## Granulating

Label presses,  
packaging presses and  
drainage presses

Series PUEHLER A., E.,  
G. Recycling, G. ReWork

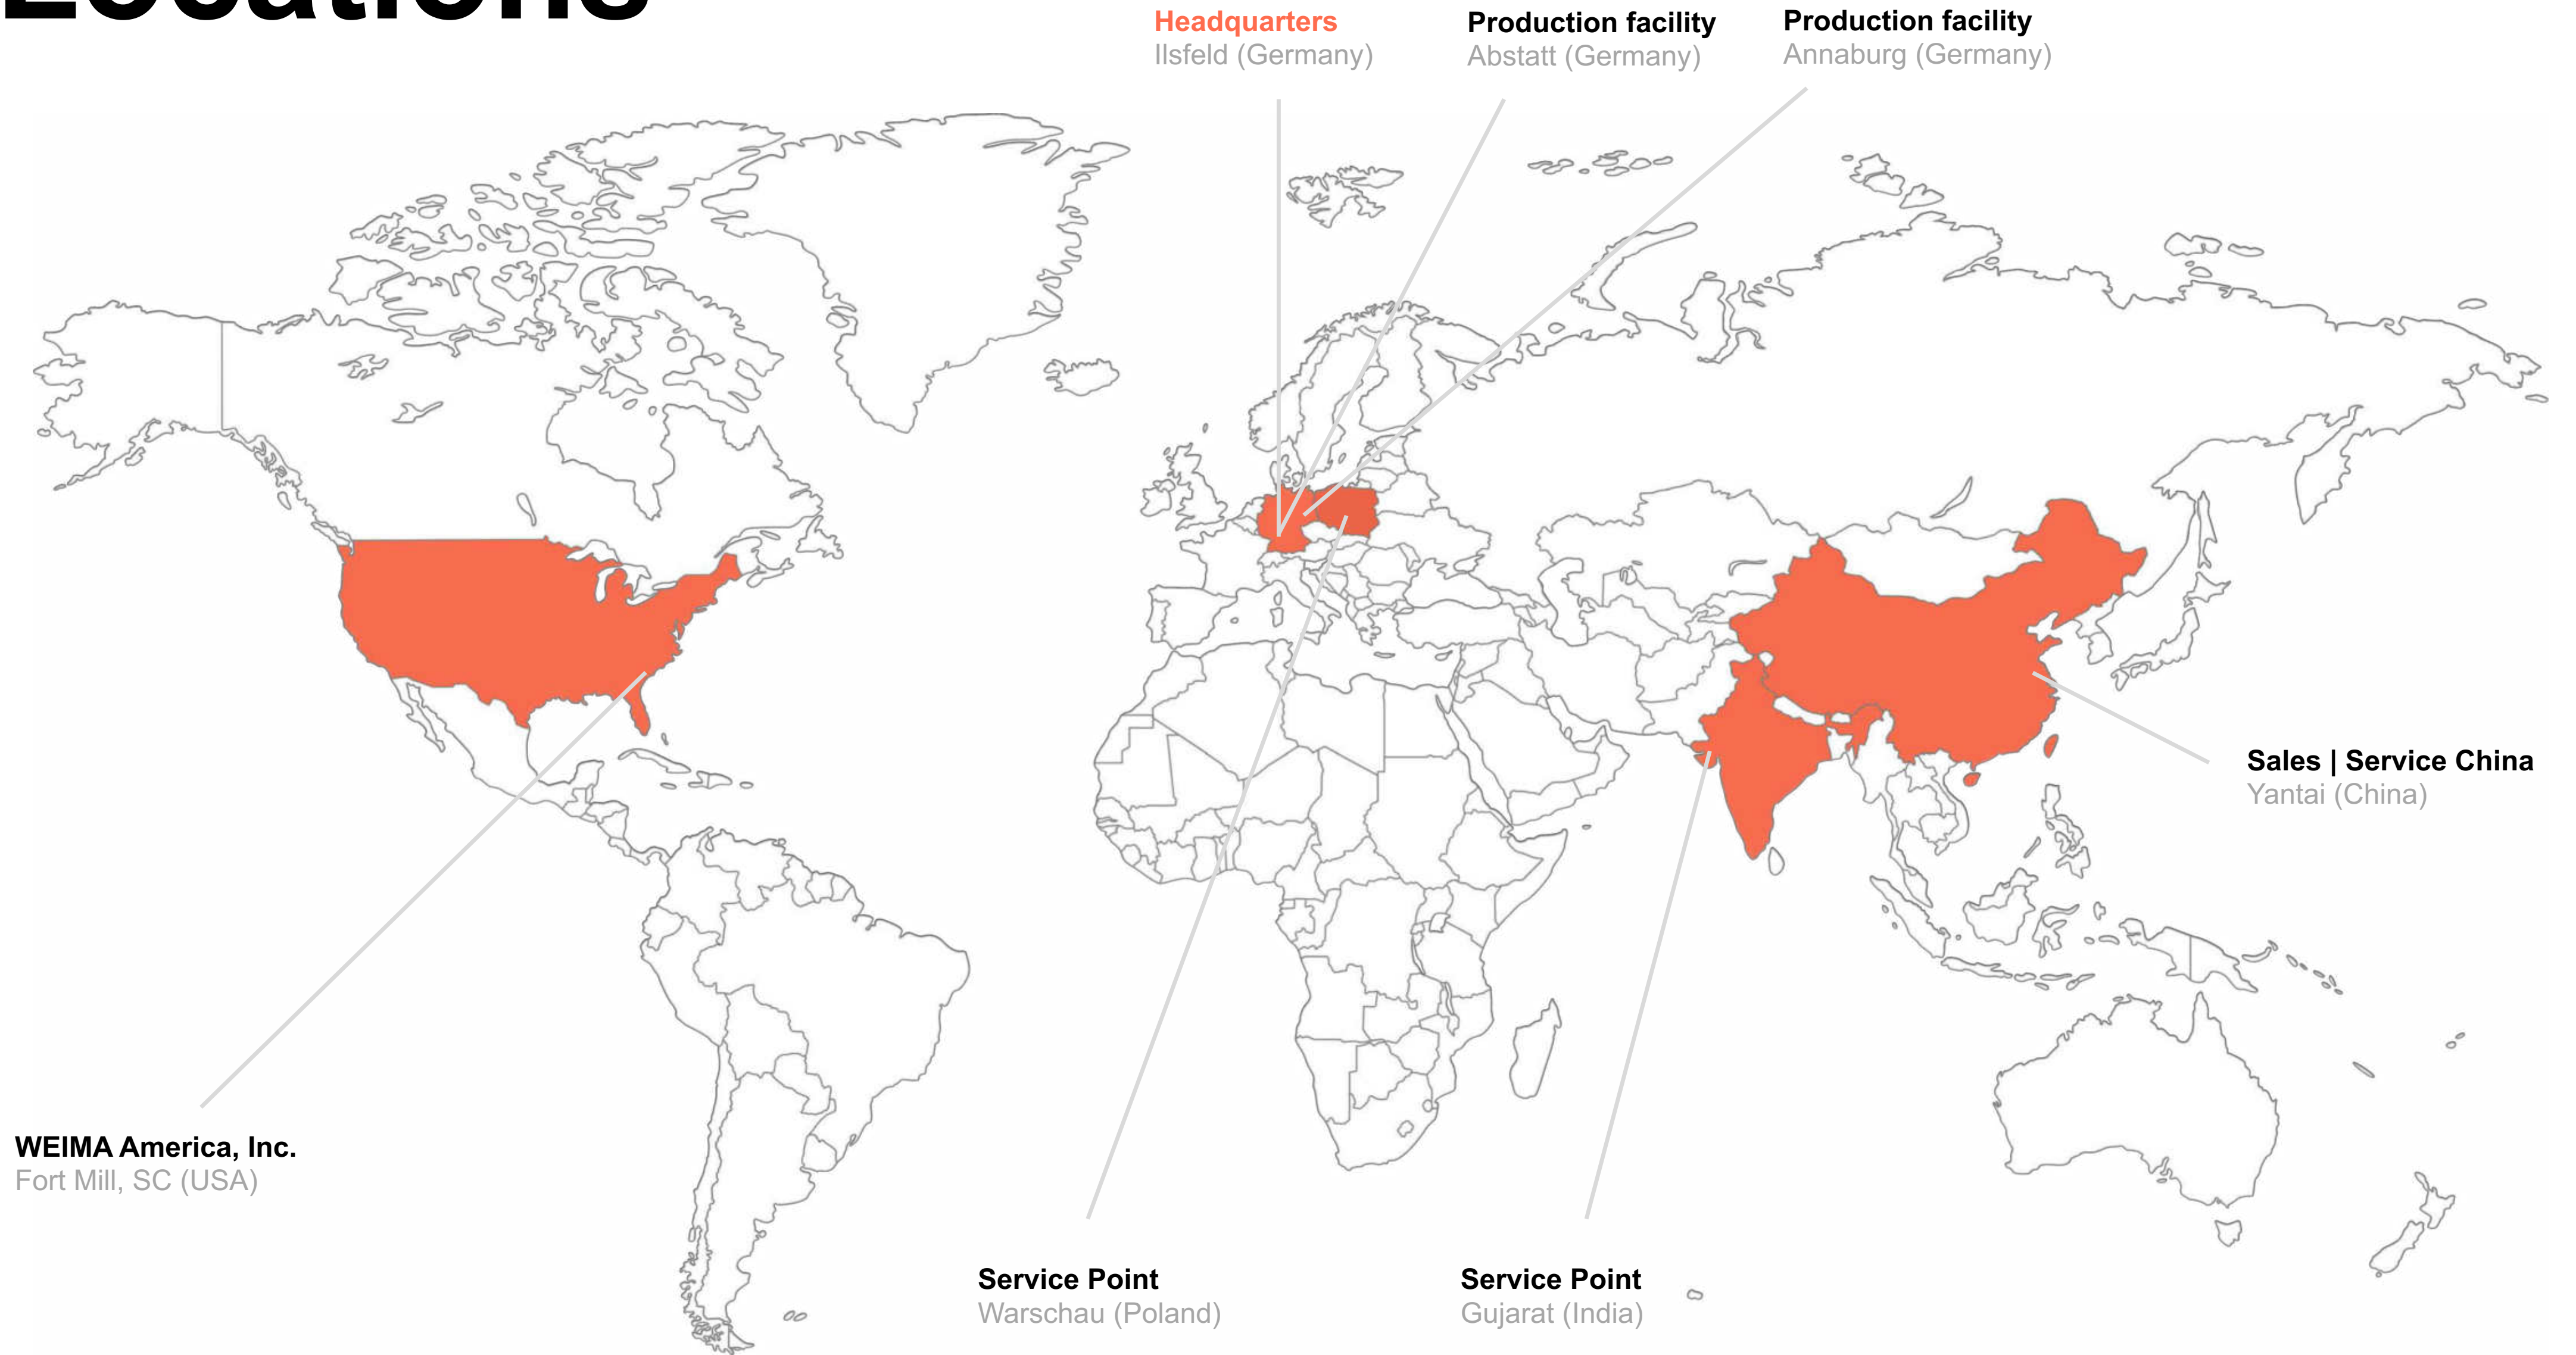

## Compressing

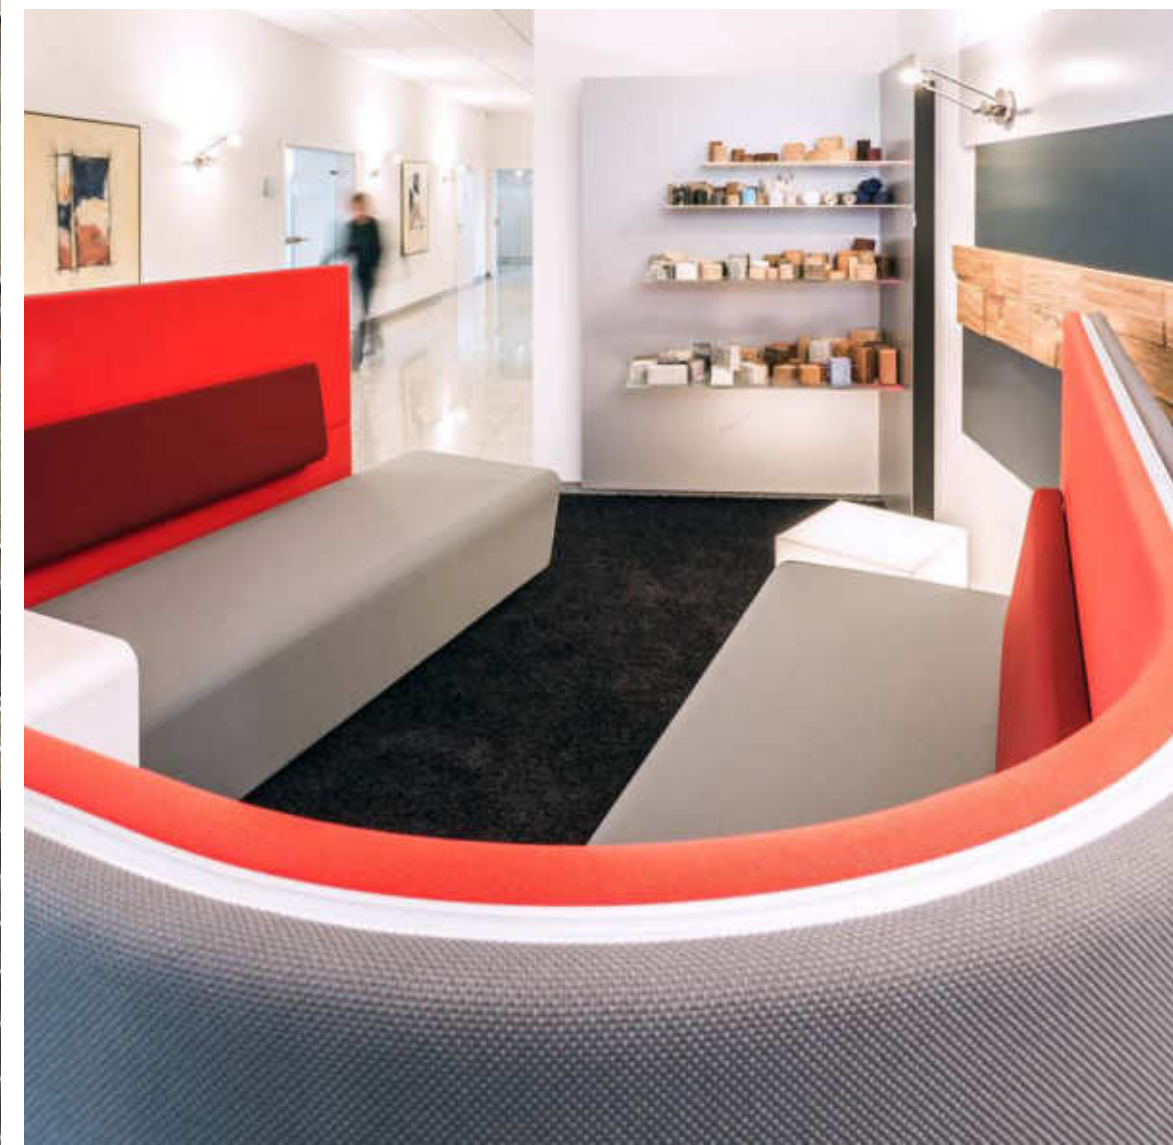

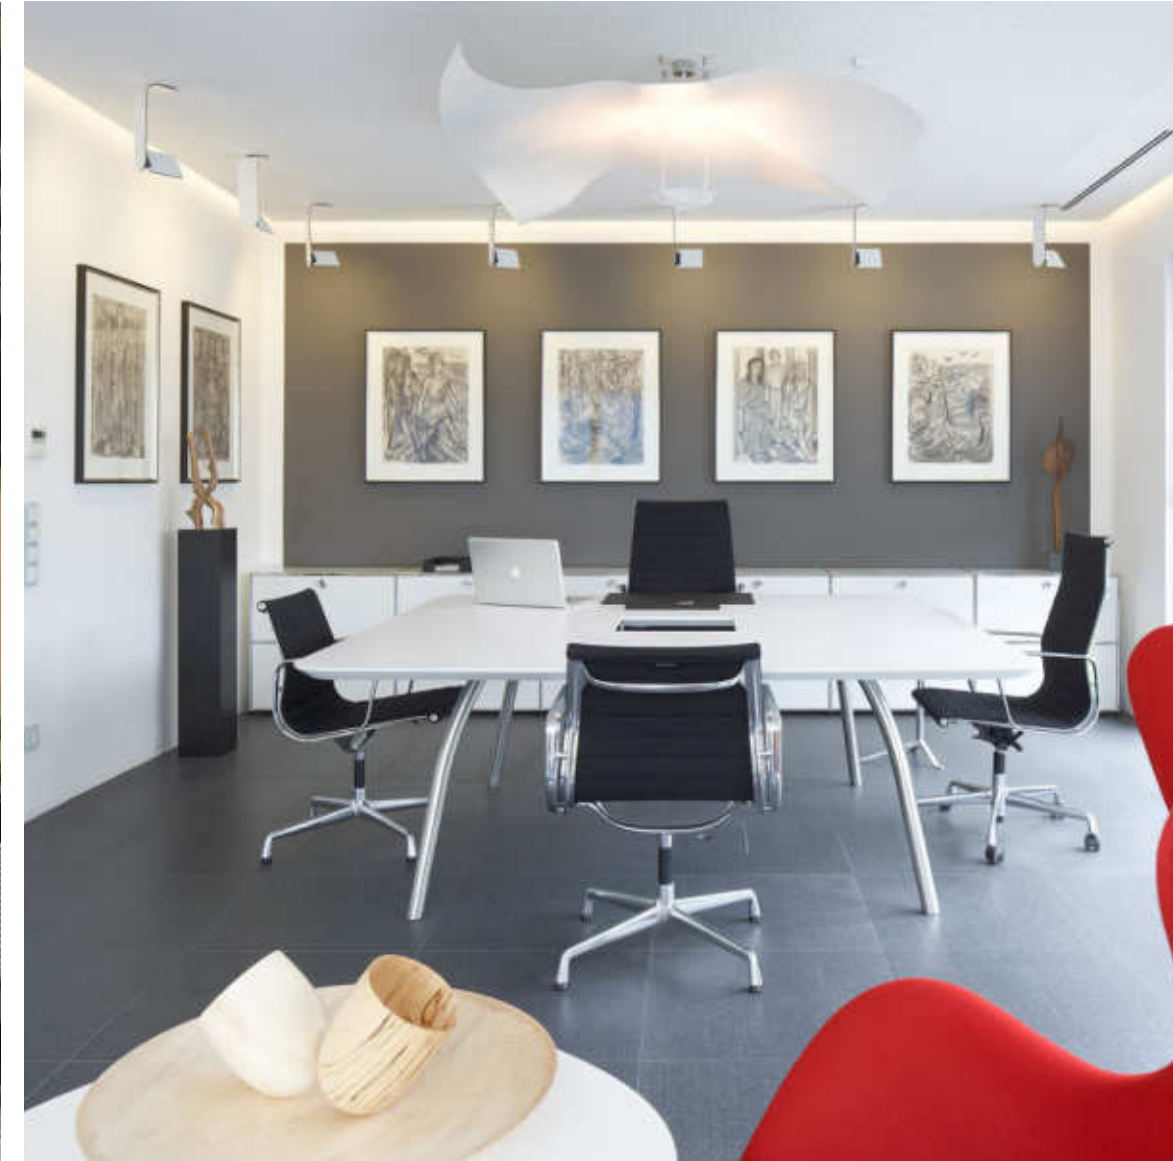

Commissioning,  
spare and wear parts  
maintenance contracts,  
trainings

## Service

# Locations

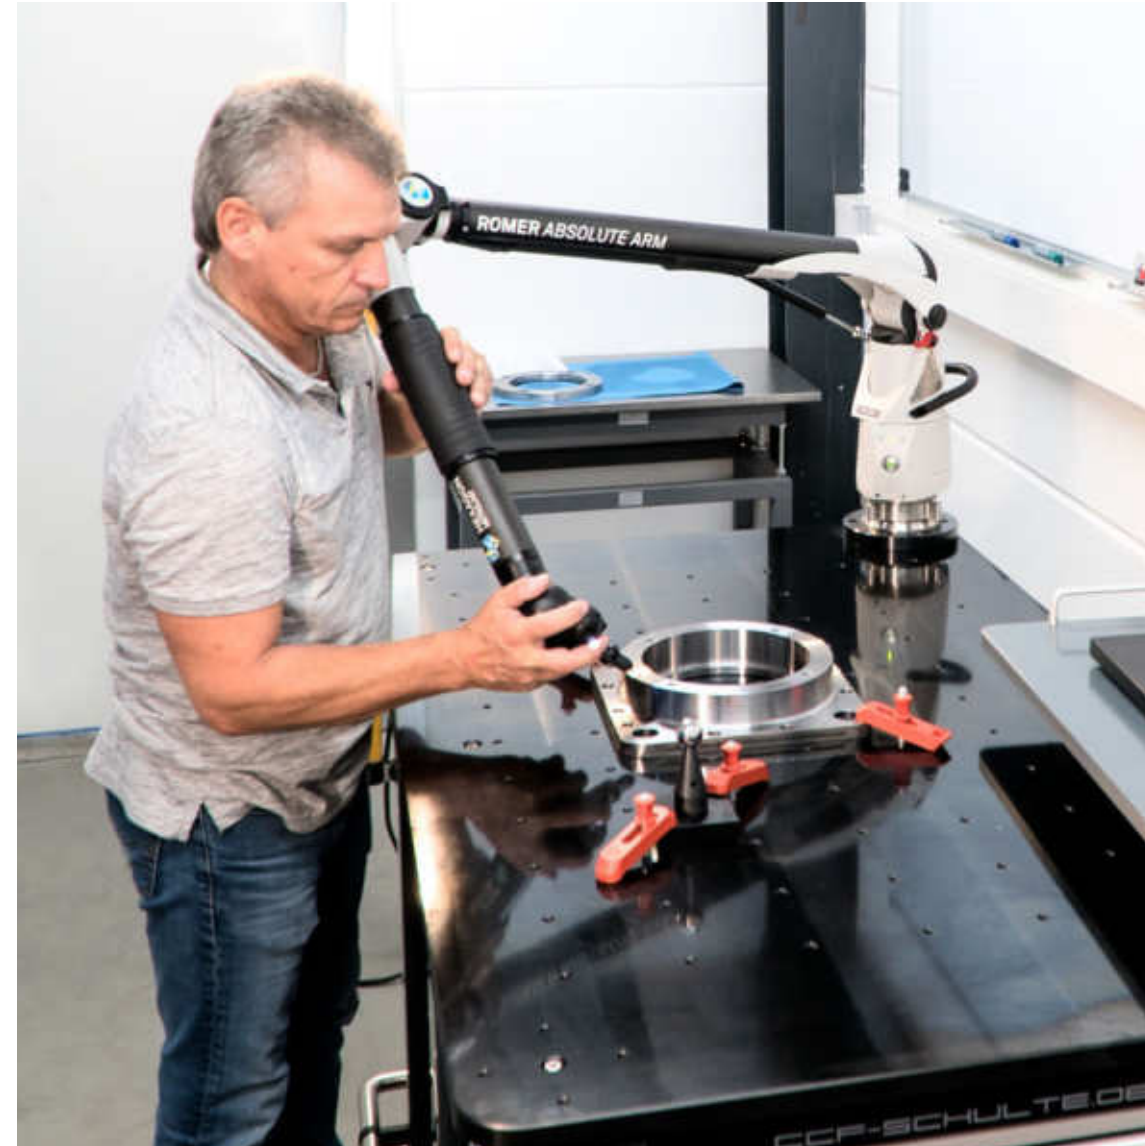

## Ilsfeld (Germany)

- Headquarters with offices of managing directors and administration
- Research & development
- Control cabinet production
- Briquette press production
- Showroom
- Quality control
- Final assembly and shipping
- Central warehouse
- Repairs

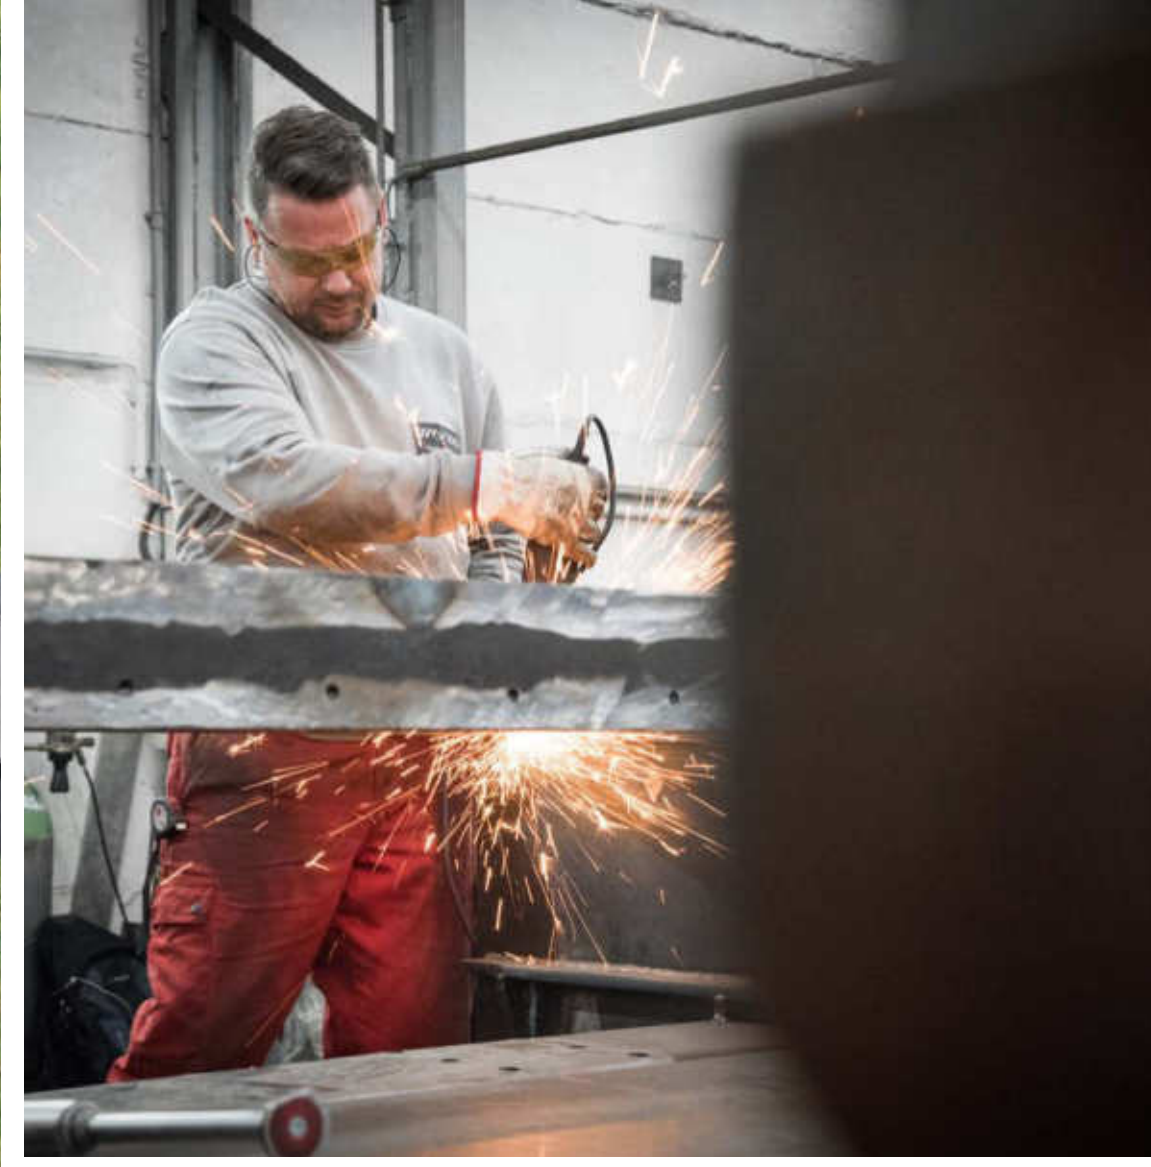

## Ilfeld (Germany)

- Headquarters with offices of managing directors and administration
- Research & development
- Control cabinet production
- Briquette press production
- Showroom
- Quality control
- Final assembly and shipping
- Central warehouse
- Repairs

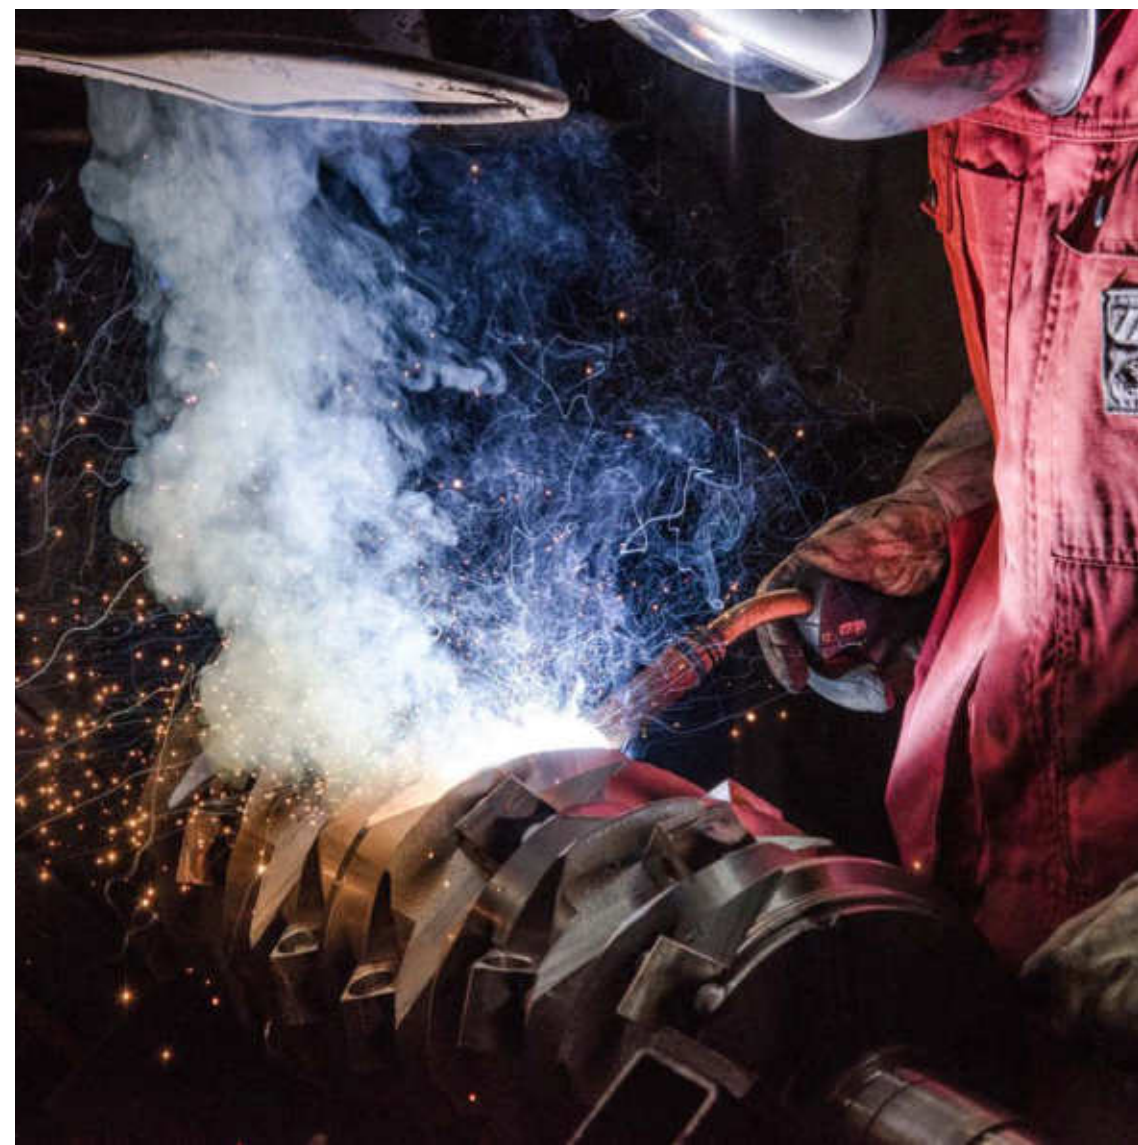

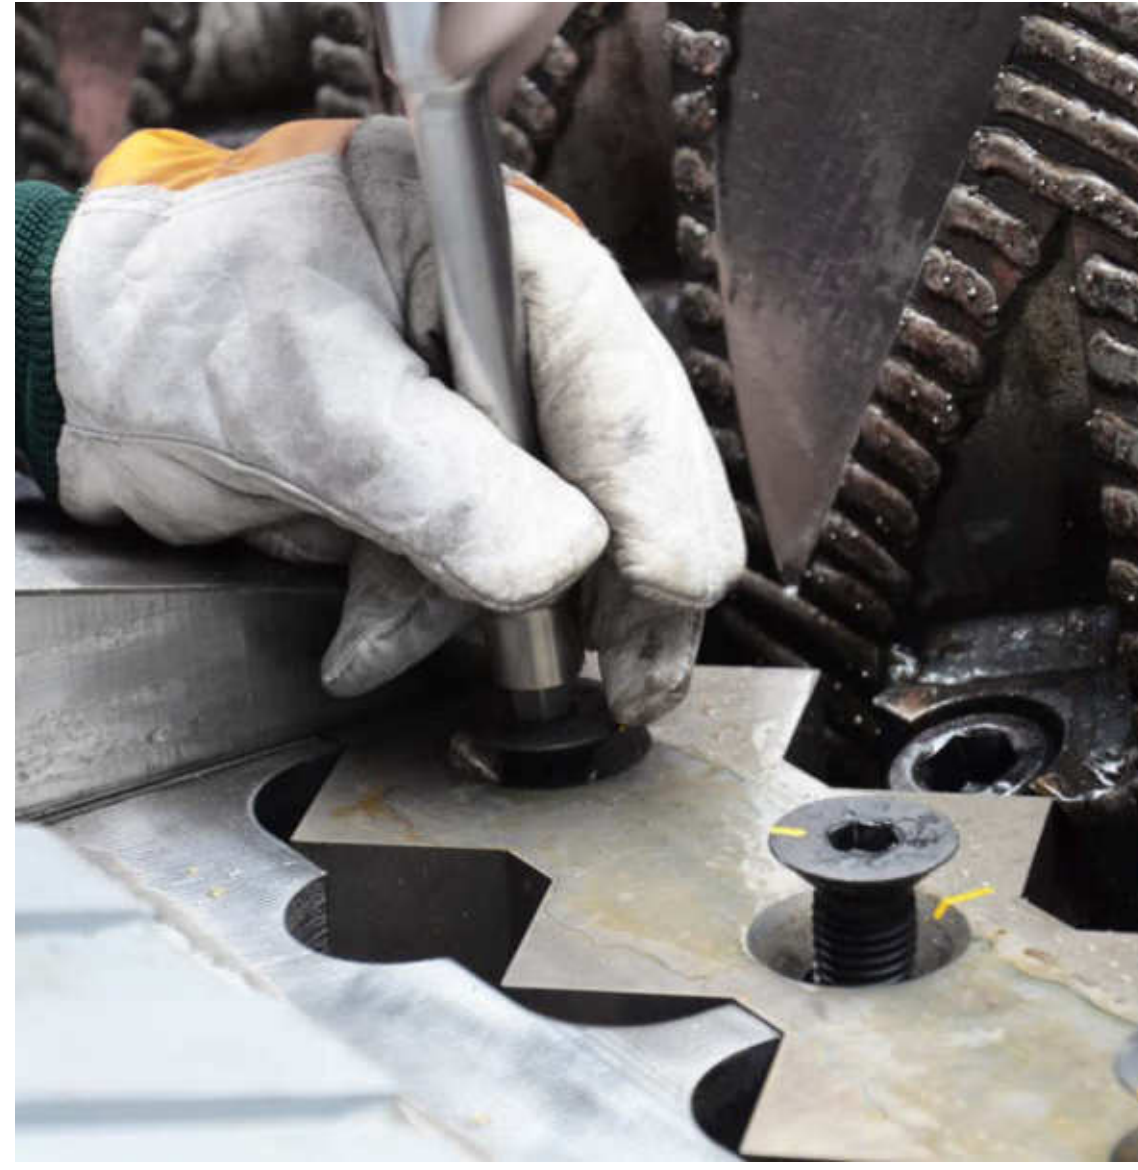

## Annaburg (Germany)

- Shredder production
- Design
- Plasma cutting
- Painting
- Quality control
- Turning, milling, welding
- Final assembly
- Test center

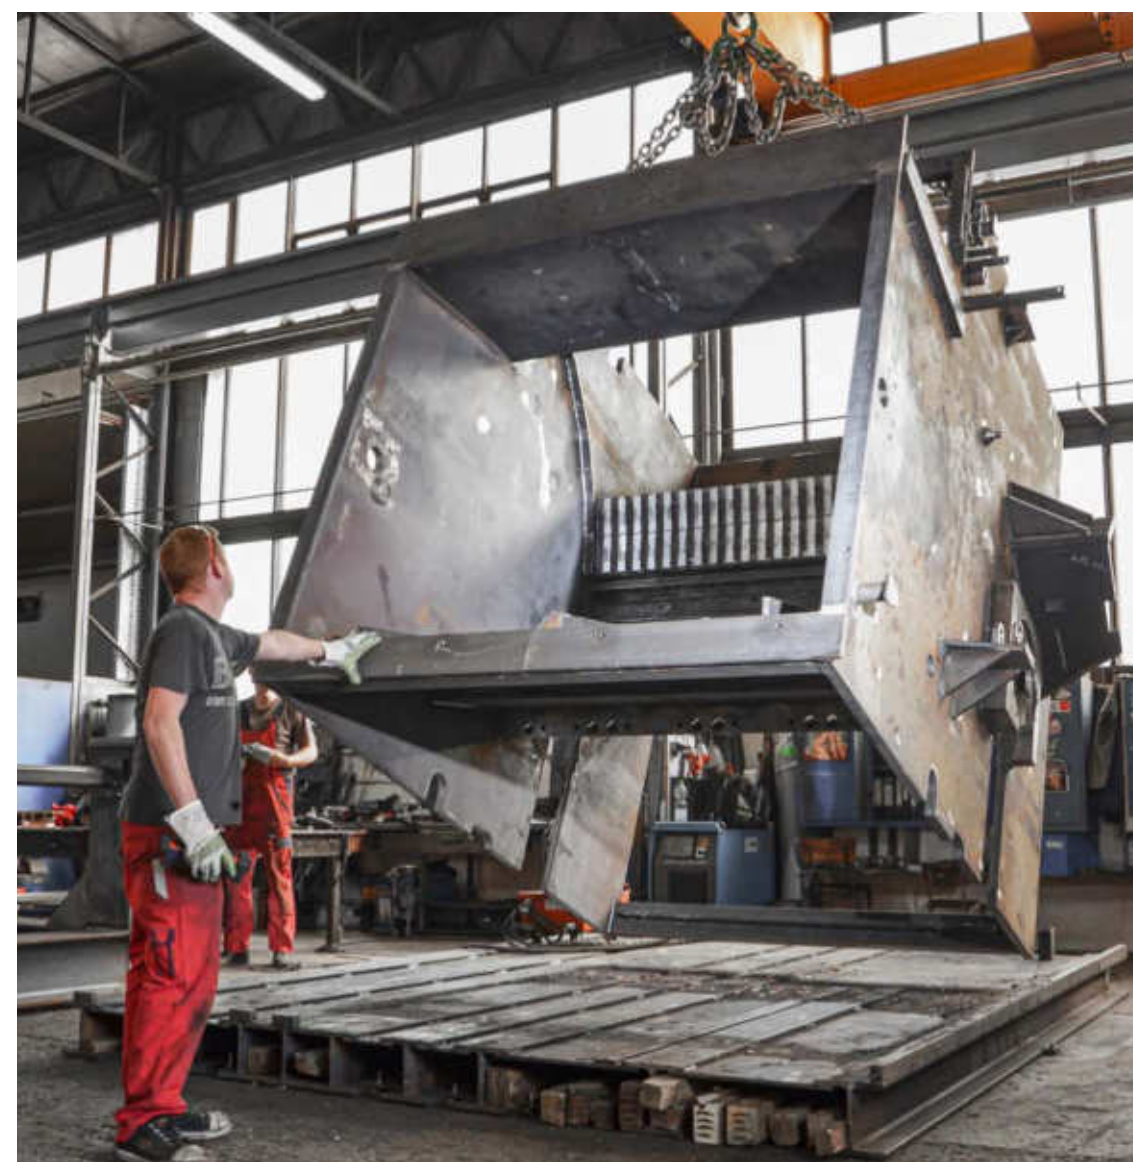

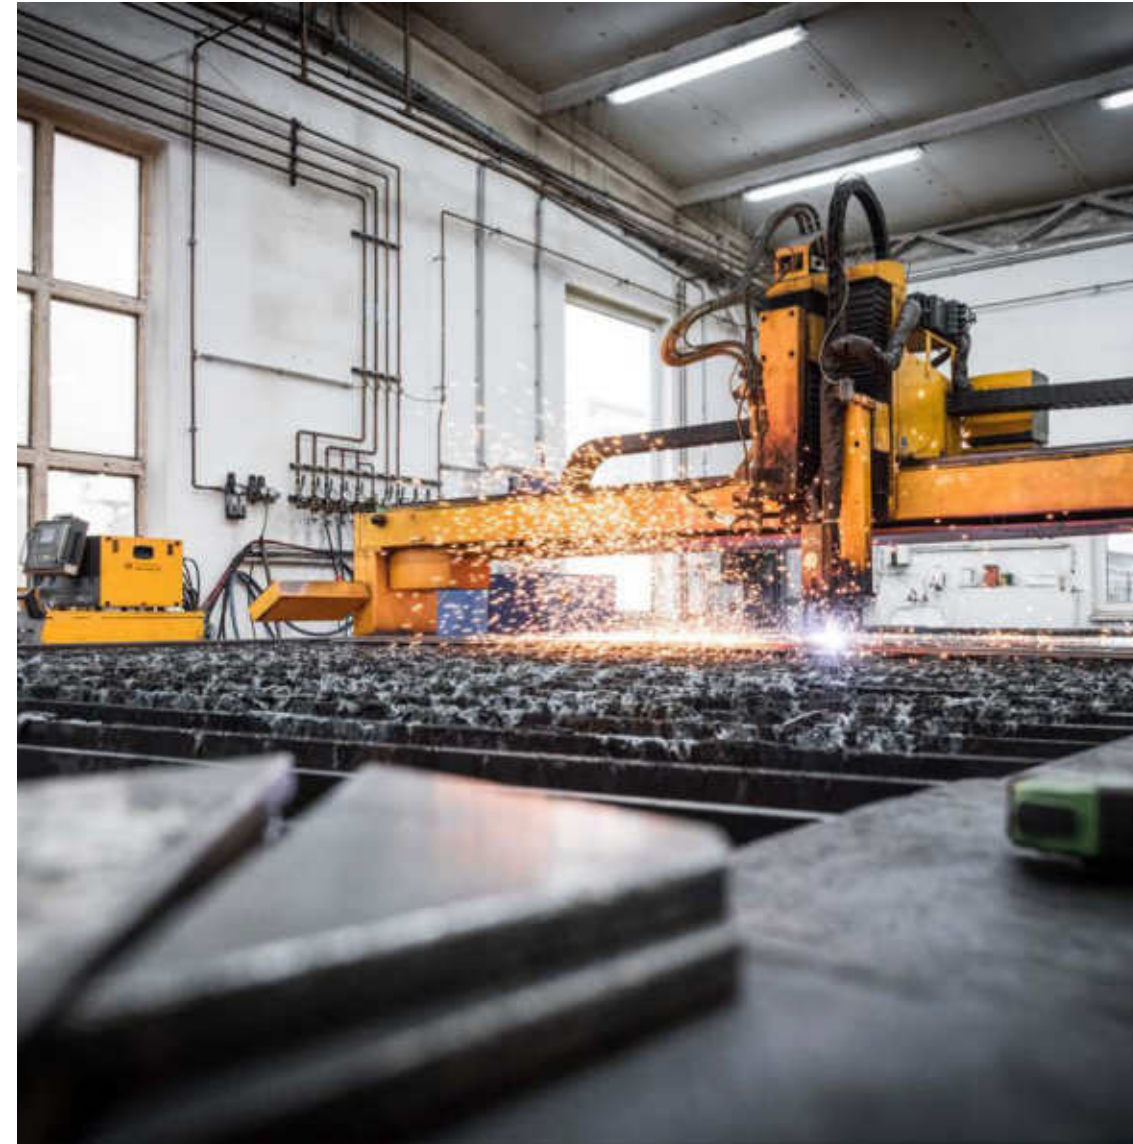

## Annaburg (Germany)

- Shredder production
- Design
- Plasma cutting
- Painting
- Quality control
- Turning, milling, welding
- Final assembly
- Test center

## Annaburg (Germany)

- Shredder production
- Design
- Plasma cutting
- Painting
- Quality control
- Turning, milling, welding
- Final assembly
- Test center

## Abstatt (Germany)

- PUEHLER presses production
- Design
- Quality control
- Turning, milling, welding
- Final assembly
- Test center

## Fort Mill, SC (USA)

- Sales and Service
- Administration North America
- Warehouse and shipping
- Repairs
- Final assembly
- Showroom

## Yantai (China)

- Production target market Asia
- Administration Asia
- Showroom
- Final assembly
- Warehouse and shipping

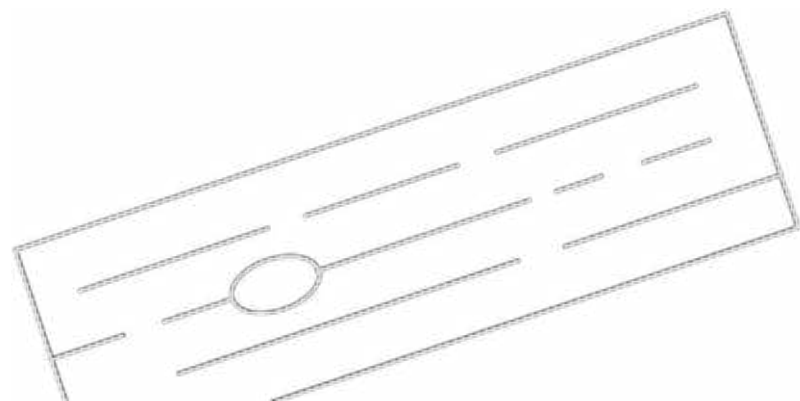

# Milestones

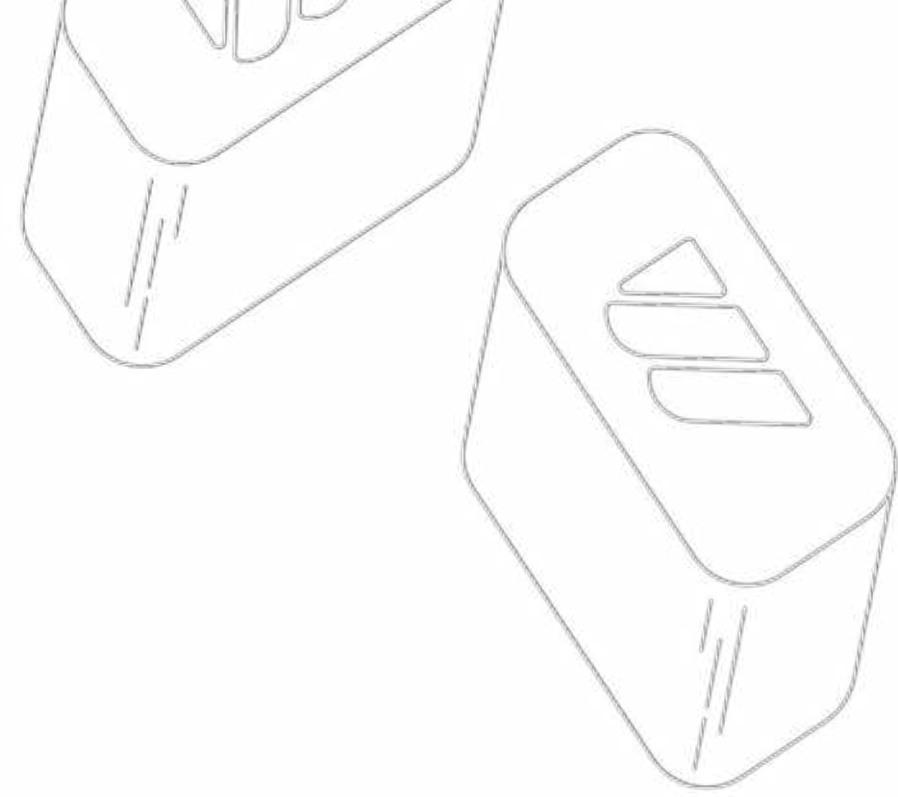

**Courage to change. Open to new ideas.**  
This has been our guideline for over 40 years.

**1980**

The beginning

Visionary and entrepreneur **Peter Rössler** founds the **Weinsberg Maschinenfabrik (WEIMA)** and manufactures one of the first industrial wood shredders for joineries and carpentries.

**1999**

## Transatlantic expansion

In order to open up new sales markets, the decision is made to conquer the American market. **Fort Mill, South Carolina**, is chosen and a sales office with facilities for final assembly and a service center is opened.

## **1982** Briquette presses

In order to **expand the machine portfolio**, briquette presses are produced soon afterwards in new production halls in the IIsfeld industrial park. In addition, the **Bavarian State Prize** is awarded to WEIMA.

## **2003** The family business

The **generation change** at WEIMA is successful. **Martin Friz** joins the company and becomes managing partner alongside Peter Rössler. The course is set for the future.

## 2006

### Second production facility in Eastern Germany

In order to be able to meet the worldwide growing demand, the WEIMA Group relocates the main part of the shredder production to **Annaburg in Saxony-Anhalt**.

### Did you know?

WEIMA's sustainability program celebrates 10 years of successful recycling.

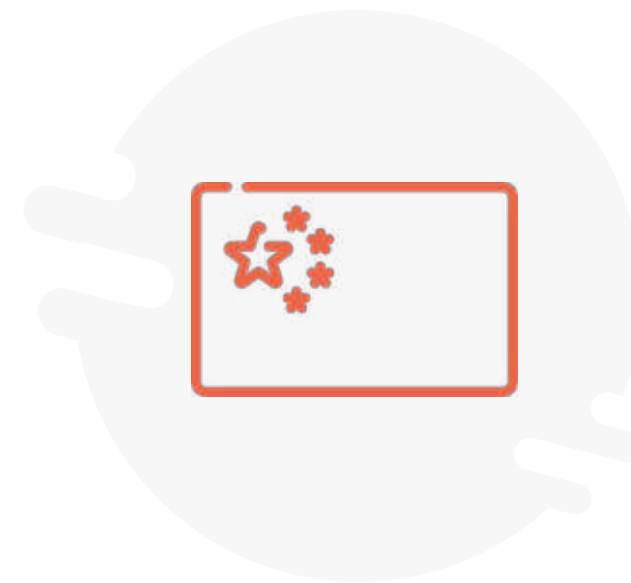

Our Destroy Responsibly™ program has made tradeshows more environmentally sound by providing an on-site shredding system at industry events where substantial waste is generated.

## 2014

### Target market China

WEIMA enters into a **joint venture** in north-eastern **Yantai**. Inside new production halls, machines are manufactured for the Chinese market exclusively.

## 2018

### Campus extension Ilsfeld (Phase 1)

The headquarters in Ilsfeld are modernized. Four years earlier, the company restaurant "**Atrium**" was opened, where over 100 employees can be catered. The **showroom** is expanded, storage capacities are increased and assembly areas are added.

## 2019

### Target market India

Shortly before the turn of the decade, WEIMA agrees on a **joint venture in north-west India**. The focus is on the expansion of the service commitment in the region.

## 2018

### Portfolio expansion PUEHLER presses

WEIMA is consistently expanding its expertise in the field of compression. With the acquisition of PÜHLER, **draining presses, recycling presses, packaging presses** and **ReWork presses** for the food and beverage industry now complement the portfolio.

## 2020+

### Campus extension Ilsfeld (Phase 2)

In addition to the **campus extension of the administration buildings (Phase 2)**, WEIMA is expanding its capacities on a large scale for the repair of used machines and service work. With the **production hall 4** further assembly areas are created. Furthermore, automated parts warehouses are being built and the control cabinet construction is being further modernized.

### Young talents

We are proud of an apprentice quota of over 10%. As a global player we are dedicated to social responsibility.

### BlueCompetence member

BlueCompetence defines robust sustainability criteria and standards that everyone who joins the initiative meets.

### ATEX Directive 2014/34/EU

WEIMA complies with the directives prescribed by the EU for the safe use of machines in potentially explosive areas.

### VDMA member

The German Engineering Federation (VDMA) represents over 3,100 companies in the capital goods industry, making it the largest industrial association in Europe.

### Product safety

WEIMA machines fulfil the quality and safety standards of the German Product Safety Act (GS).

In addition, we guarantee that all health and safety requirements of the corresponding EC directives are complied with in the manufacture of our machines (CE).

# Highest vertical integration in the market

Everything from a single source

SHREDDING + COMPRESSING

Construction | Development | Programming

GERMAN  
STANDARDS

# World market leader

**WEIMA builds more single-shaft shredders and briquetting presses than any other company\***

\*More than 1,200 units annually,  
over 35,000 since 1980

WEIMA shreds  
and briquettes

# Wood

e.g. solid hardwood and softwood, chipboard  
and plywood, multiplex, MDF

Wood is a valuable resource that can be used down to the last chip. The residues processed into wood chips can be used for direct energy generation in firing plants or for the production of briquettes.
