OUR **SOLUTIONS** ARE
A **WELL-ROUNDED**
PACKAGE

ACCORDING TO **FM GLOBAL**- & **VDS** GUIDELINES

Dirk Uhlemann / CEO

NEXT GENERATION

PASSIONATE ABOUT CUSTOMISED SOLUTIONS

Dear Sir or Madam,

did you know that we have been on the market for 18 years? Segment-Behälter-Bau GmbH – short SBB – has a long tradition! Since our foundation in 2007, we have stood for reliability, quality and innovation in fire protection.

We are proud to say that our fire water storage tanks are now an integral part of modern safety solutions. Whether in production facilities, warehouses or other institutions, our products make a decisive contribution to protecting people, property and infrastructure in an emergency. We rely on the highest quality 'Made in Germany – certified and tested according to national and international standards.

In recent years, we have not only continuously developed our technical solutions, but also laid the foundation for a successful future. Our team combines experience with fresh ideas and a high level of commitment. Sustainability and efficiency are always at the heart of what we do – to the benefit of our customers.

As one of Germany's leading suppliers, we offer you more than just products: we support your project

from the initial structural analysis through planning and manufacturing to professional installation – individually, precisely and reliably. Our versatile machinery allows us to implement even the most demanding special solutions.

Furthermore, we see ourselves not only as an economic player, but also as a social one. By supporting various social projects and the second division basketball team SBB Baskets, as well as through the targeted promotion of youth and junior sports in schools and educational institutions, we actively take on responsibility – and help shape our region in a sustainable way.

We cordially invite you to learn more about us and our work in this brochure. Thank you for your interest in Segment-Behälter-Bau GmbH – we look forward to hearing from you and to a successful collaboration.

With warm regards,
Dirk Uhlemann

PREMIUM PRODUCT

SIKA TANKS - HIGHEST QUALITY

THE DURABLE CHOICE FOR ALL REQUIREMENTS

Choose a SIKA-type tank and secure a highly durable and robust solution for your fire protection needs!

Benefit from the exceptional flexibility and durability of these tanks. Our tanks impress not only with their technical properties but also with an attractive color design that meets your aesthetic and functional requirements.

The trapezoidal sheet metal cladding not only ensures a modern appearance but also offers excellent corrosion protection—for an even longer service life for your tank. Customize your tank in your desired color (see color chart) and perfectly adapt it to your specific requirements and personal design.

Choose SIKA construction methods and invest in a customized, reliable solution for your fire protection requirements.

INLINER TANK - COMPACT & EFFICIENT

INNOVATIVE CONSTRUCTION FOR EFFICIENT USE

The compact design of our tanks allows the tanks and insulation to be constructed at the same time. A significant advantage is that the seal does not need to cure, allowing the tank to be filled immediately after installation.

A special feature of this construction is the inline membrane. It ensures that the water remains separated from the tank wall.

As the water does not encounter the ground, there is no need for a waterproof concrete foundation, further simplifying installation and reducing costs. Take advantage of this smart solution to reduce your installation costs and minimize effort. Choose our Inliner tanks and benefit from a simpler, more cost-effective, and high-performance solution for your water applications!

ACCORDING TO DIN EN 1993

WATER STORAGE FOR THE FIRE DEPARTMENT

Firefighting water storage tanks are an effective alternative to sprinkler systems, as they provide a reliable water supply for the fire department.

The integrated heated separation box is an important component, as it is not only standard equipment but also ensures that the tank is protected from freezing.

This ensures that sufficient firefighting water is always available in an emergency.

If you require further information or support, please contact us!

COMPACT & COMPLETE

SYSTEM HALL // SPRINKLER PUMP HOUSE

Due to the numerous pipes and connections required to supply sprinkler systems, the production and installation of fire water storage tanks, as well as the pump control centers themselves, is a specialized task for which our company is an experienced expert.

We manufacture all necessary components at our in-house production facility in Irxleben. In this segment, too, we offer a complete solution: tanks, pump control centers, and, if necessary, connecting structures – all from a single source. In addition to our tanks, we also offer cladding for the segmented tanks and pump control centers, including all connections and necessary functional elements.

We are happy to deliver our products to your national and international construction sites.

CONNECTING STRUCTURES

PERFECT CONNECTION

OUR INTEGRATED SOLUTIONS FOR MAXIMUM EFFICIENCY

Optimize your operations with our custom-designed tanks, optionally equipped with a high-performance pump unit and all necessary connections and functional elements. This ensures smooth operation – without any additional effort on your part!

We deliver the fully assembled components directly to your site and handle the complete installation. This guarantees not only proper and flawless operation but also a significant reduction in your workload.

Benefit from our robust construction using galvanized steel profiles, offering exceptional durability and reliability.

Rely on first-class craftsmanship and the highest quality – for optimal performance in your business processes! Trust us and let's overcome your challenges together. Contact us now to learn more about the advantages of our solutions!

INTEGRATION INTO THE SURROUNDINGS

WALL-GREENING ELEMENTS SETTING ACCENTS

Discover the diverse possibilities of tank wall-greening elements – the perfect solution for beautifying your business and landscape environments! Our innovative wall-greening elements offer not only practical advantages but also contribute to the aesthetic enhancement of public and private spaces.

Diverse Design Options

Our wall-greening elements are available in a variety of designs and materials that blend harmoniously into any environment. Whether modern, classic, or rustic – with our wall-greening elements, you create inviting green spaces that enhance the urban or rural landscape.

Sustainable Greenery

Take advantage of the opportunity to train plants and flowers to grow over the wall-greening elements. This not only promotes biodiversity but also improves the microclimate. Green walls and plant art are not only environmentally friendly but also have a positive impact on the quality of life for residents.

Add a creative touch

Our wall-greening elements allow you to add creative accents to parks, gardens, schoolyards, and public spaces. They not only serve as stylish design elements but can also function as room dividers or privacy screens.

Integrate art and culture

Use our wall-greening elements for artistic installations or as a platform for local artists. By combining art and nature, you create inspiring spaces that strengthen the identity and community spirit of your surroundings.

Create an attractive, vibrant, and sustainable environment with our tank wall-greening elements! Let's realize your project together. Contact us for more information and to discuss customized solutions. Together, we'll beautify cities and landscapes for a more livable future!

NEXT GENERATION TANK AD

CLEVER WITH COLOR; SHAPE & ADVERTISING

Benefit from the numerous advantages of our innovative fire water storage tanks, which impress with their reliability and robust construction. The customizable surface is particularly noteworthy, allowing you to optimally combine visibility, branding, and compliance.

COLOR OPTIONS:

- **Standard colors:** Opt for high-contrast, highly visible surfaces perfectly suited to the specific site lighting and fire safety requirements.

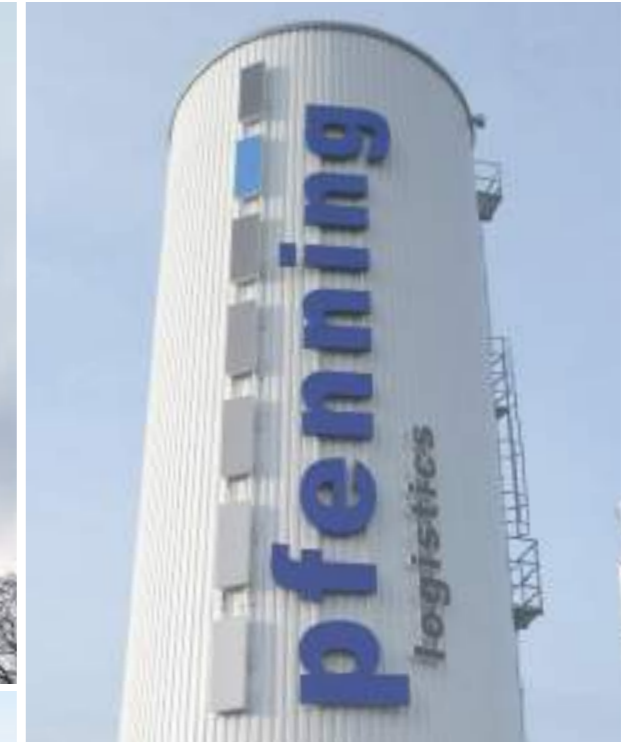

- **Corporate colors (CI matching):** We offer a color palette based on your primary corporate colors, including precise color values (Pantone/RAL) to ensure consistency across all media.

- **Warning and safety colors:** Choose from red and orange tones designed according to standards and add highly reflective accents to reinforce your corporate identity.

- **Color accent technique:** Subtle color accents highlight your brand logo without compromising the legibility of important labels.

Branding and advertising options: Design your tanks with durable logos and campaign messages applied directly to the surface. Utilize weather-resistant, easily replaceable vinyl lettering, or give your advertising a unique look – entirely according to your specifications.

We would be happy to create a customized version for you, including specific color codes, logo files, and a budget proposal. Choose quality and individuality – for a standout presence in your market! Contact us to turn your vision into reality.

COLORS

COLOR TABLE TRAPEZOIDAL SHEET METAL FOR POLYESTER PAINTS & POWDER COATINGS

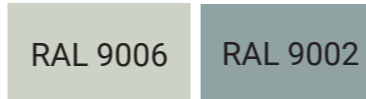

Trapezoidal sheet metal cladding provides reliable weather protection and an attractive aesthetic that can be enhanced by strategic color selection.

13 OTHER CUSTOM COLORS
(request possible!)

Even tanks without this cladding can be customised in terms of color, for example with powder coating. Discover our extensive color range - let us help you! We can easily create custom colors specifically for your brand.

ACCORDING TO VdS GUIDELINES

HIGH-QUALITY CONSTRUCTION FOR ALL WEATHER CONDITIONS

FOR EVERY REQUIREMENT WITH
MAXIMUM SAFETY

Discover our PREMIUM TANKS – the ideal solution for your most demanding storage requirements! Our specially designed tanks not only offer first class insulation but are also perfectly suited for outdoor use. With a powerful heating system, we guarantee that your supplies will remain ice-free even in extreme winter conditions.

The segment tank comes with an insulated lid, which is available in various fire protection classes according to SBB – for maximum safety in your business. The surrounding edge provides additional protection, while the practical handrail ensures safe and comfortable access.

You can also benefit from our optional controlled precipitation drainage via a rain gutter, which ensures efficient drainage of rainwater. Put your trust in our innovative solutions and the highest quality standards – for optimum efficiency and safety in your company!

Contact us today and let our experts advise you.

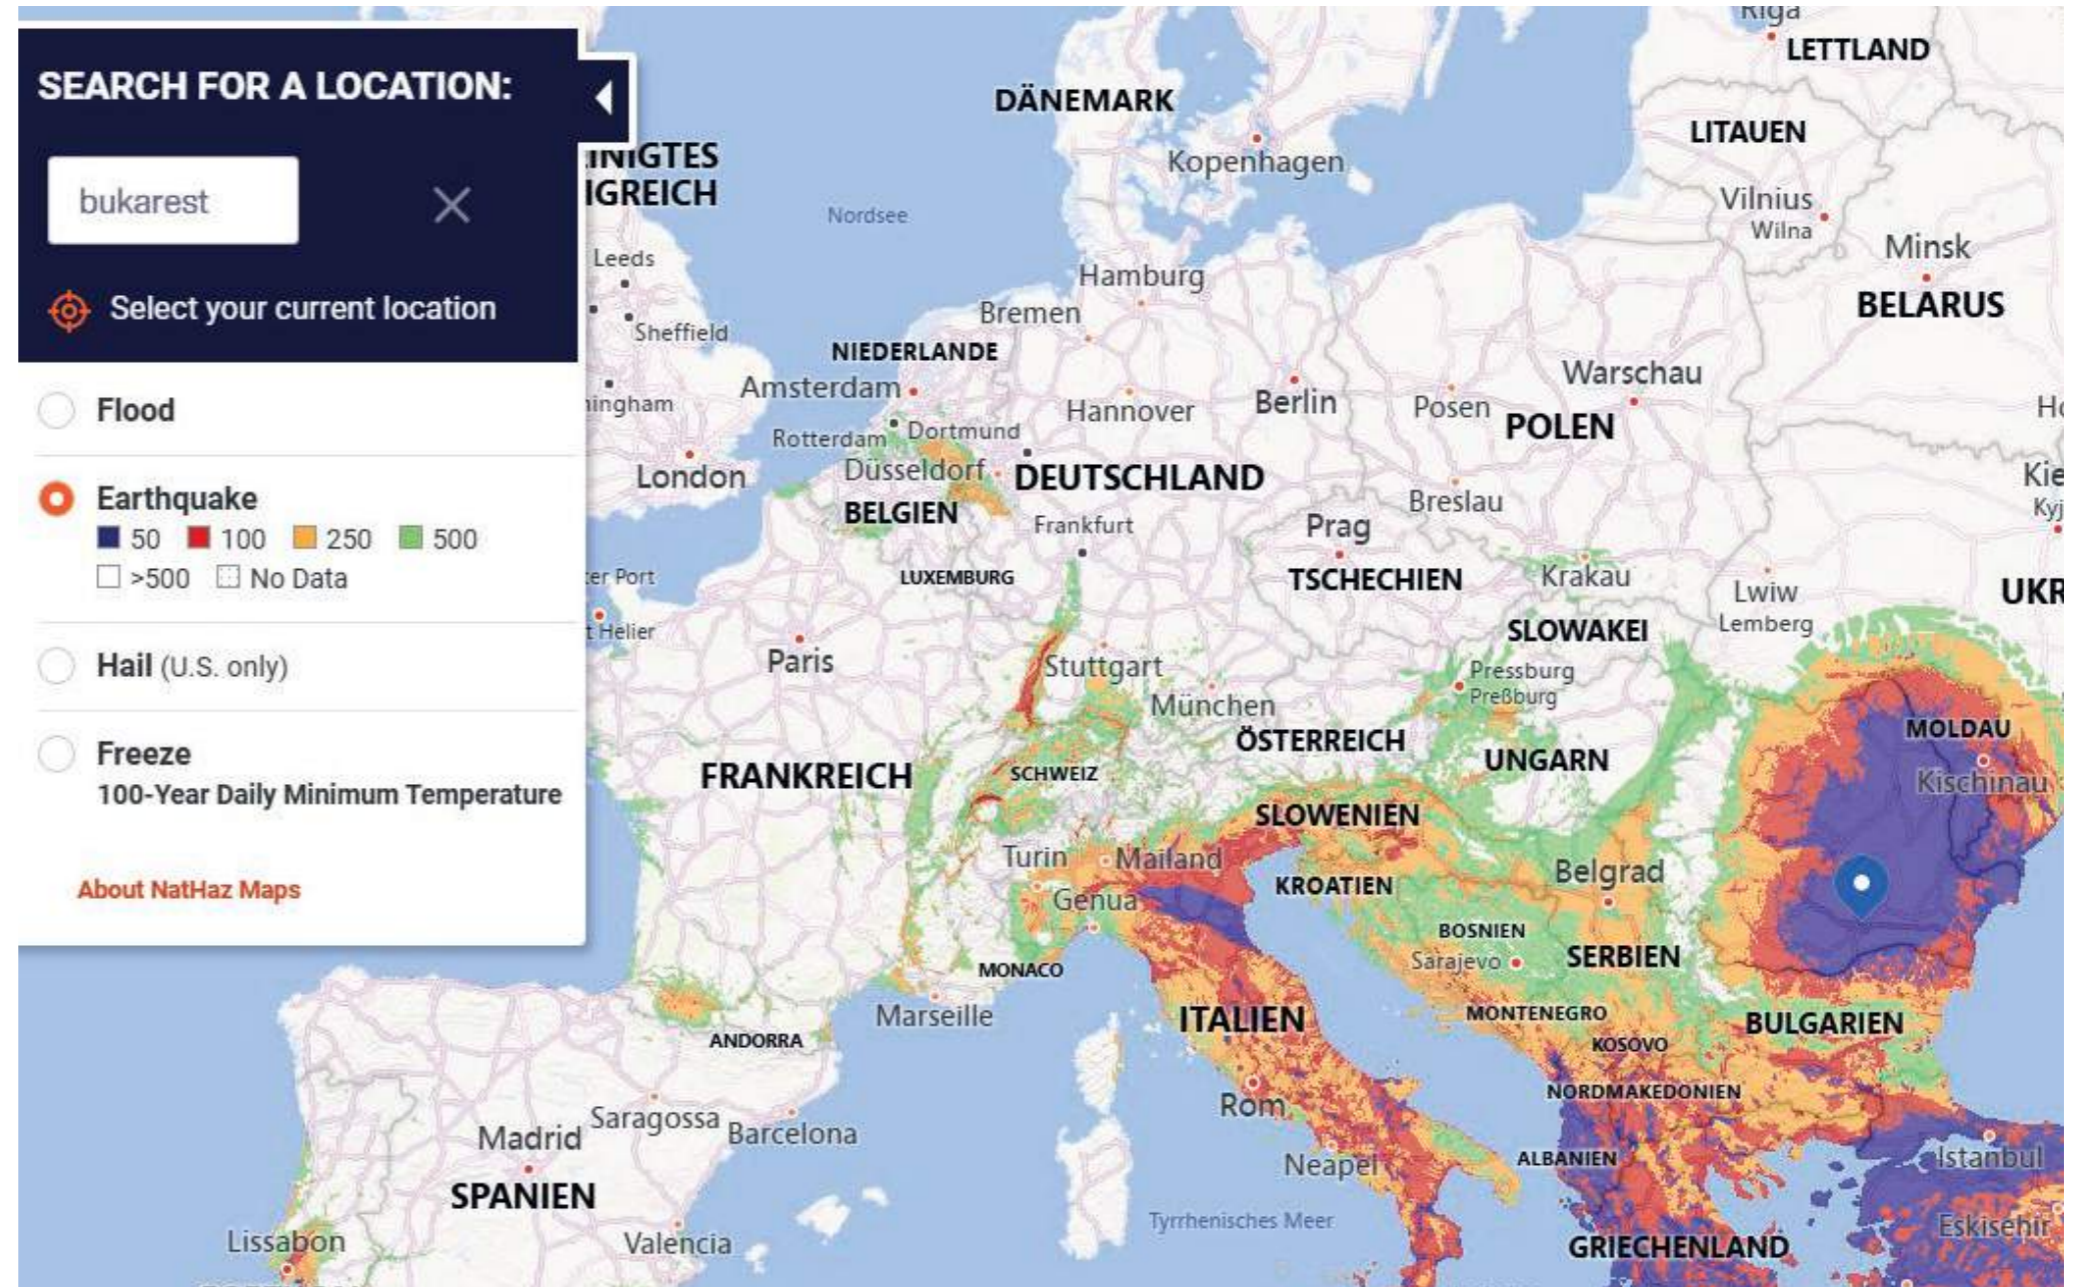

FM-GLOBAL CERTIFIED

RELIABILITY THROUGH FM CERTIFICATION

FM certified tanks are only built by approved manufacturers such as SBB. This certification guarantees that all processes involved in the manufacture of a certified tank meet the highest quality standards and comply with strict FM guidelines.

The structural integrity of the tanks is designed with seismic activity, wind and snow loads in mind to ensure the tanks remain stable and safe in extreme conditions.

Our tanks offer you not only excellent protection but also the safety you require in challenging environments.
